The original image is left untouched.

On sites where our software is sold, we have five star ratings from customer feedback for our knowledgeable and responsive support services.

Some effect products ask you to run a multi-instructional action, then use brushes or add backgrounds or use skills to mask or add layers.

\* We don't.

Some effects require you to install software, and provide your password to allow it into your applications folder.

\* We don't, but you can if you like.

Some software is just for mac or just for windows, and who develops for Elements?

\* We do

Some effects that are sold can only be used on the most recent creative cloud versions, or English language versions, or require updates with newer versions of the application.

\* We once did, but never since.

Some effects only allow you to use on personal work or have limits on distribution.

\* We don't require that - You can use the effect, or incorporate the effect into a greater art work and you can use or distribute your art anywhere. The resulting artwork is yours. You just can't resell the software.

The Charcoal effects are not the be all and end all - It is a tool for you to use. Pencil Pixels has a number of tools that emulate various traditional media like Pencil drawing, markers, watercolor, comic, caricature, enhancements and even chocolate!
